FLUTTER DEVELOPER

Flutter developer with 3.8+ years of experience building production-ready Android and iOS applications. Strong expertise in provider-based state management, Firebase, REST APIs, and real-time features like chat, voice, and video calls. Experienced in full app lifecycle development, performance optimization, and Play Store/App Store deployments.

PROFESSIONAL EXPERIENCE

Codiant - A YASH TECHNOLOGY COMPANY **Oct 2024 - Present**
Flutter Developer

- **Calcount App**: Developed a mobile fitness app to help users track meals and calories through barcode scanning, photo uploads, or manual entry. Added weekly goal tracking, and subscription features like fitness coach access and advanced reports.
- **CalCounts Pro** (Instructor Dashboard): Built a tablet-only companion app for coaches to monitor clients, with real-time stats, macro breakdowns, and a tablet-optimized UI.
- **ScribeFlo App**: Scribeflo automates clinical documentation, helps clinicians spend less time on paperwork, and prioritizes patient care. It offers features like real-time transcription, speaker differentiation (doctor/patient), smart structured note generation, offline support, and multi-device syncing.
- **Fitterloop App**: Designed the user interface and built multiple fitness calculators; integrated backend APIs to ensure smooth functionality and a seamless user experience.
- **CoachRater:** Developed a multi-provider application where coaches can register, upload achievement documents, and manage their profiles. Implemented a rater module that allows users to rate coaches and add new coaches they know. Added a guest mode enabling users to explore the platform without signing up.
- Published and maintained applications on the Google Play Store and App Store.

Mactosys Software Technology Pvt. Ltd. **Dec 2023 - Sept 2024**
Associate Flutter Developer

- **LynkLegal App**: Led the end-to-end development of LynkLegal, a comprehensive legal services booking app, enabling users to chat, call, or video call with experts like lawyers, CAs, and CS professionals, and book their services efficiently.
  Led the integration of secure payment gateway, ensuring smooth transactions for service bookings.
- **Ashfaq Dating App**: Built core communication features including chat, voice, and video calls using Agora SDK, boosting user interaction and engagement within the platform.
- **Oshler Doctor Appointment App**: Collaborated on UI/UX design, creating a user-friendly experience for scheduling doctor appointments.
- Published and maintained applications on the Google Play Store.

IndVibe Infotech Pvt Ltd. **Nov 2022 - Nov 2023**
Junior Flutter Developer

- **Edux App**: • Developed an e-learning application, owning core modules including authentication and navigation.
- Implemented secure authentication using Google Login and Firebase, and improved application stability by reducing crashes by approximately 60% through structured testing and robust error handling.
- Optimized application routing using GetX to ensure smoother navigation and a better user experience.
- **Yalla Driver App**: Yalla Driver App: Developed and refined Flutter UI components across multiple screens, ensuring design consistency, responsive layouts, and smooth driver workflows.
- Published and maintained applications on the Google Play Store.

Xcrino Business Solution **Sept 2021 - Jan 2022**
Flutter Developer Intern

- Built a Flutter-based food ordering application by converting UI wireframes into responsive screens and integrating REST APIs for restaurant listings, menu items, and order placement.
- Developed e-commerce applications for clothing purchases and quick-delivery use cases, focusing on smooth navigation, optimized UI performance, and user-friendly checkout flows.
- Collaborated with backend developers to consume APIs and handle data rendering, loading states, and basic error handling within the app.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Application
Krishna Computer Institute, Indore

Higher Secondary
Sunshine Higher Secondary School

SKILLS

- Flutter, Dart
- Bloc, Provider
- Deep Linking
- REST APIs, JSON
- Clean Architecture, MVC
- Firebase (Auth, Firestore, FCM)
- Payment Gateway Integration
- Agora SDK (Audio/Video/Chat)

TOOLS

- Github / Gitlab
- Android Studio
- VS Code / Cursor
